### What are the benefits to being a Smart DriverTEK presenter?
Volunteering with Smart DriverTEK is a great way to help keep people in your community safer on the roads. Teaching mature drivers how to use new vehicle safety technology can help extend their safe driving years. As a volunteer with Smart DriverTEK, you will be part of a network of passionate, supportive volunteers all over the country who are leading the effort to educate people about the benefits of safety technology.

### What is the time commitment?
Volunteering with Smart DriverTEK is not a huge time commitment. Each Smart DriverTEK presenter is asked to present six 90-minute SDTEK workshops each year. Smart DriverTEK volunteers are also asked to join monthly interactive webinars to hear about exciting new program components from the SDTEK National Office team.

### How would I be trained to present these workshops?
The majority of the training for this role is covered online and you will be paired with a Smart DriverTEK liaison who will help you move along in the on-boarding process. Before being cleared to present Smart DriverTEK workshops, you will be asked to virtually present a portion of a workshop for a Smart DriverTEK trainer.

### Do I need a laptop?
Yes! You need access to a laptop that is less than 5 years old that you can use when leading Smart DriverTEK workshops.

### Do I need to own a car with the latest vehicle technology in order to lead Smart DriverTEK workshops?
No, you are not required to own a car with the technologies covered in the workshop. However, we do require that you have a solid understanding of how the technologies work before presenting the workshop. We will give you all the information you need to know during the training process.

### Where would I be presenting these workshops?
Leading Smart DriverTEK workshops is very flexible. With guidance from the SDTEK team, volunteers coordinate within their local community at nearby libraries, senior centers, retirement communities, recreation centers, dealerships, etc.

### How would I get people to register for the workshops I present?
During specific months each year, national advertising efforts are used to bring participants into workshops via emails, postcards, and social media. When workshops are held during non-national advertising months, workshop participants typically hear about the workshops from promotional efforts done by the host location. Selecting a host that will be a good partner is very important.

### How can I find Smart DriverTEK workshops in my area?
Visit [aarp.org/findaworkshop](http://aarp.org/findaworkshop) to see a current list of in-person workshops. If there are no current workshops in your area, you can take the workshop online at [aarp.org/SDTEKonline](http://aarp.org/SDTEKonline).

### How would I be trained to present this workshops?
It’s easy! Just go to [aarp.org/volunteerSDTEK](http://aarp.org/volunteerSDTEK). You will find a prompt asking you to “Select your state” and “Apply” to start your application.

### Who can I email with questions?
For any questions before or after applying, email drive@aarp.org.
